DATE: November 20, 2025

TO: Commission on EMS

FROM: Elizabeth Basnett, Director
Dr. Hernando Garzon, Chief Medical Officer

SUBJECT: Exceedance of Ambulance Patient Offload (APOT) Standards – October 2025 Electronic Notification pursuant to Title 22, Division, 9, Chapter 1.2, § 100007.02.

Background

The Commission on EMS is receiving the following report to summarize all activities associated with the implementation of Assembly Bill 40 (Rodriguez, 2023-2024) related to Ambulance Patient Offload Times (APOT). EMSA has included the following background information to summarize the events and activities which demonstrate implementation of AB 40 requirements:

APOT Audit Tool Portal – Enhancements

- An update was deployed November 7th, 2025, allowing users to export all information contained in the audit tool. This includes their own notes, discrepancies, and "recalculated" APOT. This serves to enhance user experience and analysis.
- EMSA continues to improve the Audit Tool Portal based on user feedback from hospital and LEMSA users. Enhancing usability and user experience remain a top priority to EMSA. EMSA staff continue to provide direct support to Audit Tool users.

APOT Audit Tool Portal – Utilization Summary

- To date, 187 hospitals have registered for the audit tool. EMSA is working with the California Hospital Association to increase registration.

Hospital APOT Reduction Plan Compliance

- EMSA staff continue to track and document all Hospital APOT Reduction Protocols.
- As of November 20, 2025, 127 hospitals have submitted their 2025 annual update.
- EMSA is engaging LEMSAs and the California Hospital Association to increase compliance.

- EMSA expects approximately 220,000 records each month that meet the APOT criteria. In October 2025, roughly 185,00 records met APOT criteria, 84% of the total records expected. EMSA continually conducts targeted outreach to LEMSAs who's larger (greater than 1000 monthly transports) EMS providers were not compliant or documenting the new AB 40 elements correctly.

Summary APOT Data for October 2025

- EMSA calculated 90th percentile offload time for all general acute care hospitals (GACHs) with emergency departments using the specifications outlined in the emergency regulations on November 19th, 2025, for October data. EMSA identified GACHs that exceeded their LEMSA APOT standard. These GACHs will be instructed to implement their hospital APOT reduction protocols. Summary information based on October 2025 APOT data and audits can be found below.
    - 319 of 327 hospitals (97%) had at least one EMS patient transport which met APOT documentation criteria.
    - Of the 319, only 286 (90%) had more than sixty (60) EMS patient transports to their facility for the month of October.
    - 155 of those 286 (54%) hospitals exceeded their local APOT standard.
    - 108 hospitals submitted APOT audit reports.
    - Of these 108 hospitals, 46 (41%) already met their LEMSA APOT standard.
    - There was a total of 7152 discrepancies identified among the 108 completed hospital audits, representing ~.03% of all APOT qualifying records.
    - Of those 7152 discrepancies identified, 5,308 (74%) of them would not change the patient offload recorded by EMS to be below their LEMSA APOT Standard. This supports the need for additional education surrounding targeted auditing.
    - 48 of 63 (~76%) facilities would not have had their APOT-1 calculations shift to being compliant because of their identified discrepancies, assuming all record discrepancies were agreed upon and corrected. 15 of 63 (~23%) facilities may have gone from exceeding their local standard to compliant with their local standard if all discrepancies were accepted.
- EMSA is working with our partners to provide additional education surrounding best practices for auditors, specifically focused on targeted auditing by hospitals to gain compliance with local APOT standards.

Approach to Bi-Weekly Meetings

- EMSA began bi-weekly meetings on November 3, 2025. EMSA delayed this initiative to ensure maximum provider compliance with the new ePCR requirements and to allow hospitals time to meet the reporting requirements for their APOT reduction plans.
- EMSA will focus the bi-weekly meetings on the 15 hospitals experiencing the longest offload delays that exceed their local APOT standard. This targeted approach aims to address the needs of the communities served by these hospitals and to directly influence the reduction of offload delays.
- As of November 19, 2025, EMSA hosted 16 calls (initial or follow up) with 15 individual hospitals. Some meetings included representatives from local EMS agencies, and EMS providers who transport to that facility. EMSA will continue to meet with the 15 hospitals who most significantly violate their local APOT standard.
- Delays in funding allocation for EMSA's AB 40 implementation significantly impacted its ability to hire the necessary positions to carry out related activities. As EMSA onboards additional staff, it will expand its approach and outreach strategy. Once staffing resources are sufficient, EMSA will expand the scope of the bi-weekly meetings to include all hospitals exceeding their local APOT standards.

Exceedance of Ambulance Patient Offload (APOT) Standards – Detail

- The following general acute care hospitals were identified as exceeding the local APOT standard established by their LEMSA *(page 6, below)*. In accordance with Title 22, Division, 9, Chapter 1.2, § 100007.02 "Exceedance of APOT Standards - Required Actions," EMSA instructed the general acute care hospitals in the table below to implement their APOT reduction protocol no later than five (5) business days after the date of notification (November 20, 2025). All hospitals received the following detailed statistics and data points used to make this determination:
    - Monthly offload count:
    - 90th percentile APOT:
    - Local APOT standard:
    - Exceedance of standard:
    - Count of records exceeding standard:
    - Percent of records above standard:
    - Audit Completed (Yes or No):

Report Note: Hospitals with less than 60 offloads are excluded from our assessment and the table included in this report for the following reasons:

- Not all EMS provider agencies are reporting to the new data standard, resulting in some hospitals with significant numbers of missing records for transport they received. This deficiency of data may bias the APOT calculation.
- This approach aligns with the California Department of Health Care Services' Data De-Identification Guidelines.
