DATE: March 23, 2026

TO: Commission on EMS

FROM: Elizabeth Basnett, Director
Dr. Hernando Garzon, Chief Medical Officer

SUBJECT: Exceedance of Ambulance Patient Offload Standards – February 2026 Electronic Notification pursuant to Title 22, Division, 9, Chapter 1.2, § 100007.02.

Background

The Commission on Emergency Medical Services (EMS) is receiving the following report to summarize all activities associated with the implementation of Assembly Bill 40 (AB) (Rodriguez, 2023-2024) related to Ambulance Patient Offload Times (APOT). The Emergency Medical Services Authority (EMSA) has included the following background information to summarize the events and activities which demonstrate implementation of AB 40 requirements:

APOT Audit Tool Portal – Enhancements

- An update was applied to the APOT Audit Tool allowing users to view the count of APOT qualifying records, calculated percentage of APOT records meeting the local APOT standard, and their 90th percentile offload time. These figures recalculate each time new APOT qualifying records populate into the Audit Tool. This feature was added in an update on February 27, 2026.

APOT Audit Tool Portal – Utilization Summary

- To date, 220 hospitals have registered for the audit tool, an increase of 5 from last month. EMSA is working with the California Hospital Association to increase registration.

Hospital APOT Reduction Plan Compliance

- EMSA staff continue to track and document all Hospital APOT Reduction Protocols.
- As of March 16, 2026, 177 hospitals have submitted their 2025 annual update, the same number as last month.
- EMSA is engaging local emergency medical services agencies (LEMSAs) and the California Hospital Association to increase compliance.

Summary APOT Data for February 2026

- For February 2026 data, there were 200,819 records that met APOT criteria, a decrease of 21,830 records from last month. EMSA continually conducts targeted outreach to LEMSAs with EMS providers who are not compliant or document the new AB 40 elements incorrectly.
- For February 2026 data, using specifications outlined in the emergency regulations, EMSA calculated 90th percentile offload time for all general acute care hospitals (GACHs) with emergency departments on March 16, 2026. GACHs identified by EMSA as in exceedance of their local APOT standard will be instructed to implement their hospital APOT reduction protocols.
- Summary information based on February 2026 APOT data and audits can be found below.
    - 316 of 327 hospitals (97%) had at least one EMS patient transport which met APOT documentation criteria.
    - Of the 316 hospitals, 299 (95%) had more than 60 EMS patient transports to their facility for the month of February.
    - Of the 299 hospitals, 161 (54%) hospitals exceeded their local APOT standard. **This number excludes GACHs in Alameda County. Please reference the report notes on page 3.*
    - 112 hospitals submitted APOT audit reports, an increase of 4 from last month.
    - Of those 112 hospitals, 49(44%) already met their local APOT standard.
- EMSA is working with our partners to provide additional education surrounding best practices for auditors, specifically focused on targeted auditing by hospitals to gain compliance with local APOT standards.

Approach to Bi-Weekly Meetings

- EMSA is focusing the bi-weekly meetings on the 15 hospitals experiencing the longest offload delays that exceed their local APOT standard. This targeted approach aims to identify the unique needs of communities served by these hospitals and to directly influence the reduction of offload delays.
- In March, EMSA reached out to 20 hospitals for bi-weekly calls. Of those that were contacted, 11 hospitals responded and participated in these meetings, an increase of one from February. Meeting participants include hospital representatives, EMS providers, and LEMSAs. This does not include daily conversations with hospitals, LEMSAs, and EMS providers associated with AB 40 compliance, utilization of the APOT audit tool, and sharing best practices.

EMSA continues to request the 15 hospitals who most significantly exceed their local APOT standard to meet for discussion, time permitting.

Meetings in November 2025: 21
Meetings in December 2025: 12
Meetings in January 2026: 17
Meetings in February 2026: 10
Meetings in March 2026 (to date): 11

Exceedance of Ambulance Patient Offload Time Standards – Detail

- The following GACHs were identified as exceeding the local APOT standard established by their LEMSA *(page 4, below)*. In accordance with Title 22, Division, 9, Chapter 1.2, § 100007.02 "Exceedance of APOT Standards - Required Actions," EMSA instructed the GACHs in the table below to implement their APOT reduction protocol no later than five business days after the date of notification (March 23, 2026). All hospitals received the following detailed statistics and data points used to make this determination:
    - Total monthly offloads
    - Percent of offloads meeting standard (Goal: 90%)
    - 90th percentile APOT
    - Local APOT standard
    - Amount exceeding standard
    - Count of offloads exceeding standard
    - Percent of offloads exceeding standard
    - Audit Completed (Yes or No)

Report Notes:

During this reporting period, a data flow disruption was discovered for one of the larger Alameda County EMS Providers, resulting in roughly 50% of their data representation not being populated into CEMSIS. Due to the scope of this missing data set, EMSA has decided to exclude all Alameda hospitals from this month's assessment. This issue is being investigated by the LEMSA. Additionally, EMSA reached out to LEMSA and affected hospitals to use their best judgement on whether they should implement their APOT reduction plans.

Hospitals with fewer than 60 offloads are excluded from our assessment and the table included in this report for the following reasons:

- Not all EMS provider agencies are reporting to the new data standard, resulting in some hospitals with significant numbers of missing records for transport they received. This deficiency of data may bias the APOT calculation.

- This approach aligns with the California Department of Health Care Services' (DHCS) Data De-Identification Guidelines.

LEMSA APOT Standards (For February 2026 Data)
